CORRECTIONS TO AMENDMENT

In response to the Official Action dated 6/5/95, the Applicant filed his Amendment earlier today, and is hereby correcting certain errors noted since. Also a check in the small entity one month extension fee of \$55 was attached. The following are these incorrect claims as they should have appeared.

C/ 8. (amended) The invention in accordance with claim [1]19 wherein said illumination comprises acoustic radiation.

C/ 28 (twice amended). In a motor vehicle having an interior passenger compartment having contents comprising [objects and] at least one occupant, each said occupant having at least one part,

an interior monitoring system comprising:

a) Pattern recognition means to detect the presence of and to identify said at least one occupant, said means comprising: (i) means to illuminate at least each said occupant whose said at least one part is to be [identified] located, and (ii) a trained pattern recognition means, said trained pattern recognition means having been trained on data of said at least one occupant;
